AWS GenAI Proof-of-Concept

by PREDICTif

Experience the power of Amazon Bedrock on **AWS** with:

PREDICTif's Rapid GenAI Proof of Concept

Discover the limitless possibilities of Amazon Bedrock on **AWS** with PREDICTif's Rapid GenAI Proof of Concept offering. This unique opportunity allows you to quickly leverage the expertise of PREDICTif Solutions, *an **AWS** advanced consulting partner with production-level experience for Bedrock*. Together, we'll explore Amazon Bedrock's capabilities and design a high-impact Proof of Concept (POC) tailored exclusively to your business within as little as **2 weeks.**

Our Rapid POC Process (2-4 weeks):

1. **Discovery/Kick-off:** Collaborate to align business objectives, review your AWS setup, and identify impactful AWS Bedrock use cases. Assess data sets, security standards, and success criteria.
2. **Design Phase**: Create a secure, scalable, and cost-effective POC architecture with APIintegrations.
3. **Implementation:** Build AWS services and the POC architecture, followed by testing and knowledge transfer.

Deliverables Include:

- Amazon Bedrock single use case non-production implementation
- Architecture diagram for the proposed product-grade state
- Total Cost of Ownership (TCO) estimates for AWS services
- Scope of Work (SOW) proposal to achieve production-grade implementation, including AWS funding support

Tap into GenAI's boundless potential on AWS with PREDICTif Solutions. Explore the limitless possibilities and supercharge your business growth. Get in touch with us today.
